

Sports Fields

For over thirty years DW Clark has been constructing and draining sports pitches and golf courses, as well as improving existing facilities.

Specialist equipment, highly trained and experienced staff and the best quality materials available guarantee that the highest standards are maintained throughout planning and construction. Accuracy, speed of installation, minimum disruption and reinstatement help to ensure that the playing surface is returned to full use as soon as possible.

Contracts have been completed nationwide for professional and local clubs, schools, colleges and local authorities.

The Drainage Team installing pipe for Haberdashers College, London.

Continual investment in staff training and new equipment ensures that the latest technology is available to enable contracts to be completed as efficiently and accurately as possible.

Levelling of base layer over an artificial membrane during construction of cricket wicket for North Somerset Council at Weston Super-Mare.

A comprehensive range of specialised sportsturf equipment is owned and operated by the company, including continuous chain trenchers, banding, grooving and sand dressing equipment, excavators, stone delivery hoppers and earth moving equipment.

Pipes are laid to accurate falls thanks to heavy investment in the latest laser grading technology.

If you are interested in the professional services available from DW Clark and would like to know more, then please telephone Jim Wheeler on 01608 685800 or email info@dwclarkdrainageltd.co.uk
